Sayyid Al-Hakeem: to Serve Citizen, Strengthen Youth Presence, Al-Hikma Project Priorities

His Eminence Sayyid Al-Hakeem, Head of the National State Powers' Alliance and Leader of Al-Hikma National Movement, met several organizational leaders in the capital, Baghdad, commending the efforts made in serving the missionary project, and noting the importance of introducing this project because it holds the welfare of Iraq and its people, and stressing the necessity of confronting targeting campaigns and not paying them any heed.

H.E. said that the project of Al-Hikma National Movement began, at first, as something unfamiliar, but has today become a point of adoption by many political blocs, noting that "Al-Hikma" seeks to implement good ideas even if others adopt them later on, and pointing to the necessity of reflecting on the moment of announcing the emergence of Al-Hikma National Movement and the circumstances surrounding it, considering the Movement's emergence a milestone for serving the people and empowering youth, affirming that targeting is directly proportional to the scale of influence, and placing on the members of Al-Hikma the responsibility of defending their project.

H.E. also stressed the provision of services to citizens and that the Hikma project should be their first resort when seeking services, calling for diversifying the mechanisms of providing them, along with the necessity of caring for youth and empowering them. H.E. affirmed the importance of combating corruption without selectivity or favoritism, renewing his call to halt the escalation in the region and restore stability.
